New Hair Remover In Demand, Say Druggists

(Faciliate Removes Roots and All)

Since the virtues of phaeoline as a hair remover became generally known, druggists in this country have been having a really extraordinary demand for this remarkable product. The fact that it actually removes the roots—before one's very eyes—as well as the surface hairs, is of course mainly responsible for its large and increasing sale. The new method is not to be compared at all with the usual depilatory, electrical or other processes. It is entirely safe, non-detracting to the complexion and instantaneous! A stick of phaeoline, used in accordance with the simple instructions which accompany it, is certain to satisfy and delight the user. Advertisement.

Should women be paid for being mothers?

Last year 250,000 babies were lost and 23,000 mothers died in child-birth.

They died because they lacked attention—because the United States Government failed to give them the protection it gives to hogs and cattle.

The foundation of tomorrow's democracy is being undermined. Something must be done to wipe out this condition which makes the United States a disgrace among nations.

You can do that something. Read "Every Woman's Chance to Serve Humanity" in February Good Housekeeping. Anne Martin tells what is wrong and explains how you can do your part.
